

# TEBBEN

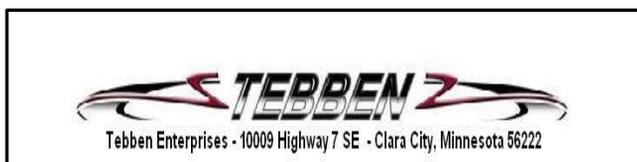

## STUMP GRINDER

Tebben's hydraulically powered Stump Grinder can make your stump removal a breeze with its high visibility, very easy use in tight areas, and it's easy maneuverability.

The TSG-40 consists of a 40" diameter cutting wheel made from  $\frac{3}{4}$ " thick steel plate which allows you to tackle any size stump. The high strength carbide cutting teeth chew thru the stump with ease turning it into mulch.

The Tebben universal mount plate is designed to work on almost any type of skid steer loader. The hydraulic hoses are standard sizes and use flat face couplers to make hook-up quick and easy.
